General information about this litter and our process for matching puppies to new forever homes.

Thank you for inquiring about our puppies. Here is a basic set of answers to questions you may be asking. We assume you have looked at the puppies on our web site - <https://www.teulugreatdan.es.com>.

We do not take deposits, but put folks interested in our puppies on a mailing/wait list and send them an information form to fill out and send back to us. At 8 weeks we start matching new homes with each puppy after we learn more about each home, prior experience with Danes, if they want to show etc. When we reach agreement with a new owner we execute a purchase contract to be paid in full before transfer of puppy to the new home at week 10 to 12.

For 2024 the base cost is \$3500 plus the cost of ear cropping which brings the total cost to \$3850. We include dewclaw removal, microchipping, prepaid AKC registration, copy of the AKC certified litter pedigree and inoculations up to the time of shipping.

Shipping costs normally include a required vet health certificate, a veri-kennel airline approved shipping crate, and air freight charges. Certificate and shipping kennel have run around \$209-300. Airfreight another \$300 to \$600. But with inflation those estimates might be a bit low.

We require the total puppy sale cost prior to shipping and include an invoice for all the related shipping costs with the document package that goes on the crate.
